PROFESSIONAL SUMMARY

Full Stack Developer with professional experience building scalable web applications using React.js, Next.js, TypeScript, Node.js, and NestJS. Strong experience in frontend architecture, reusable component development, REST API integration, state management, responsive UI development, and backend API development. Hands-on experience with Prisma, PostgreSQL, authentication, role-based access control, WebSockets, webhook integrations, caching, transaction-based database operations, and real-time application workflows. Experienced in developing healthcare, management, fundraising, and customer-support applications with a focus on maintainability, performance, security, and scalable architecture.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui, Responsive Design

State & Data: Zustand, TanStack Query, REST APIs

Backend: Node.js, NestJS, Prisma, WebSockets, Webhooks, Authentication, RBAC

Database: PostgreSQL, SQL, Transactions, Query Optimization

Tools: Git, GitHub, Git Bash, Swagger, Postman, Docker

EXPERIENCE

ITOI Technologies — Software Developer

Nov 2024 – Present

- Developed scalable and SEO-friendly web applications using Next.js, React.js, TypeScript, HTML5, CSS3, and Tailwind CSS for healthcare and management platforms.
- Built reusable, responsive UI components and frontend architecture focused on maintainability, performance, and consistency.
- Implemented frontend state management using Zustand and server-state management using TanStack Query.
- Developed and integrated REST APIs across frontend and backend applications.
- Developed backend APIs and services using NestJS, Prisma, and PostgreSQL.
- Implemented secure authentication, session management, and role-based access control (RBAC).
- Implemented transaction-based database operations for reliable and consistent application workflows.
- Improved backend performance using asynchronous caching and memoization.
- Implemented WebSocket-based real-time communication.
- Developed webhook-based Chatwoot integrations for automated communication and chatbot workflows.
- Worked across frontend and backend layers to debug production issues and deliver end-to-end features.
- Participated in code reviews, debugging, API integration, and production issue resolution.

Kanini Data Solutions — XML Developer

Sep 2024 – Oct 2024

- Maintained and validated structured XML content with a high degree of accuracy.
- Worked with structured data and followed defined content quality and formatting standards.

PROFESSIONAL PROJECTS

TeleDoctor — Healthcare / Telemedicine Platform

■ [Live Demo](#)

Next.js, React.js, TypeScript, Zustand, TanStack Query, NestJS, Prisma, PostgreSQL, Tailwind CSS, WebSockets, Chatwoot

- Developed a scalable telemedicine platform supporting patients, doctors, administrators, and TFC management portals.
- Built reusable and responsive frontend components using Next.js, React.js, TypeScript, HTML5, CSS3, and Tailwind CSS.
- Implemented state management using Zustand and server-state management using TanStack Query.
- Developed scalable backend APIs using NestJS, Prisma, and PostgreSQL.
- Implemented secure authentication, session handling, and RBAC across application modules.
- Implemented transaction-based database operations for data consistency.
- Developed WebSocket-based real-time communication for live workflows.
- Integrated Chatwoot webhook-based chatbot workflows.
- Worked on backend performance improvements using caching and memoization.
- Contributed to debugging, API integration, production issue resolution, and end-to-end feature development.

GiveCharity — Fundraising Platform

■ [Live Demo](#)

Next.js, React.js, TypeScript, Zustand, TanStack Query, Tailwind CSS

- Developed a web-based fundraising platform connecting donors with fundraising campaigns and causes.
- Built responsive and reusable frontend components using React.js, Next.js, TypeScript, HTML5, CSS3, and Tailwind CSS.
- Implemented campaign management workflows and user-facing interfaces.
- Integrated REST APIs and managed application state using Zustand and TanStack Query.
- Developed responsive interfaces focused on usability, maintainability, and performance.

Church Management System

Angular, TypeScript, Tailwind CSS

- Developed a management dashboard for membership management, event scheduling, and community activities.
- Built reusable and responsive UI components using Angular and Tailwind CSS.
- Implemented data-driven interfaces for managing complex application workflows.

PERSONAL PROJECT

SupportHub — Customer Support & Chatbot Integration Platform

Next.js, React.js, TypeScript, TanStack Query, Tailwind CSS, NestJS, Prisma, PostgreSQL, REST APIs, WebSockets, Webhooks

- Designed and developed a centralized customer support platform as an independent full-stack personal project.
- Developed an embeddable support chat widget that applications can initialize and integrate into their own projects.
- Enabled customer messages submitted through the widget to be routed to a centralized SupportHub dashboard.
- Designed the platform to support multiple projects, with conversations and support data isolated by project.
- Implemented project-level roles and permissions for secure access to conversations and support operations.
- Developed a webhook integration mechanism allowing each integrated project to configure its own webhook for processing customer messages and generating automated bot responses.
- Integrated webhook responses back into the SupportHub conversation flow so customers can receive automated responses through the widget.
- Implemented ticket escalation and email notification workflows for conversations requiring human support.
- Implemented WebSocket-based real-time communication for live conversation updates.
- Built the SupportHub dashboard using Next.js, React.js, TypeScript, Tailwind CSS, and TanStack Query.
- Developed backend APIs and business logic using NestJS, Prisma, PostgreSQL, and REST APIs.
- Designed the architecture so multiple applications can use the same support widget, centralized dashboard, webhook-based bot integration, and project-level access controls.
- Maintained the project in Git/GitHub and developed and tested the application locally.

EDUCATION

MET Engineering College

B.E. Computer Science and Engineering — CGPA: 7.61

2024 | Nagercoil, Tamil Nadu

Affiliated to Anna University

CERTIFICATIONS

- Introduction to JavaScript — Great Learning
- Front-End Web Development — Coursera
- Responsive Web Design — Coursera
- UI/UX Design Fundamentals — Coursera
- Introduction to Generative AI — Coursera
