

PROFESSIONAL SUMMARY

Full Stack Developer with strong expertise in Frontend Development, skilled in building scalable, high-performance web applications using React and Next.js, with working experience in backend development using NestJS and Prisma. Experienced in reusable component architecture, API integration, performance optimization, responsive UI development, and efficient state management using Zustand and TanStack Query. Skilled in developing scalable frontend features while contributing to backend APIs, authentication workflows, third-party integrations, and performance-focused engineering solutions.

Skills

Frontend : React.js, Next.js, JavaScript (ES6+), TypeScript

State & Data : Zustand, TanStack Query, REST APIs

UI : Tailwind CSS, shadcn/ui, Responsive Design

Backend : Node.js, NestJS, Prisma

Database : PostgreSQL, SQL

Tools : Git, GitHub, Git Bash

Experience

ITOI Technologies

Software Developer

Nov 2024 - Present

- Developed scalable and SEO-optimized web applications using Next.js and React for healthcare and management platforms with role-based access workflows.
- Built reusable, responsive, and user-friendly UI components using Tailwind CSS and TypeScript to improve frontend consistency and maintainability.
- Implemented frontend state management using Zustand and optimized server-state handling with TanStack Query.
- Integrated and managed REST APIs across frontend applications within Agile development workflows.
- Developed and optimized scalable backend APIs using NestJS, Prisma, and PostgreSQL with secure transaction-based database operations.
- Improved backend performance and processing efficiency using asynchronous caching and memoization techniques.
- Integrated WebSocket-based real-time communication features across application workflows.
- Implemented webhook-based Chatwoot chatbot integrations for automated communication management.
- Contributed to secure authentication, session handling, and role-based access control implementation across multiple application modules.

Kanini Data Solutions

XML Developer

Sep 2024 - Oct 2024

- Maintained structured XML content with a high degree of accuracy.

Projects

- **Teledoctor:** Developed a scalable telemedicine platform with secure authentication, role-based access control, and intuitive interfaces for patients, doctors, administrators, and TFC management portals using Next.js, React, TypeScript, Zustand, TanStack Query, NestJS, Prisma, PostgreSQL, and Tailwind CSS. Built reusable and user-friendly UI components with responsive, performance-oriented frontend architecture. Integrated automated Chatwoot chatbot workflows through webhook-based event handling for real-time communication management. Optimized core backend services and processing pipelines using asynchronous caching and memoization techniques to improve application performance and reduce redundant operations. Implemented secure and scalable backend APIs with transaction-based database handling to ensure reliable state management and data consistency. Contributed to frontend-focused full stack development by integrating WebSocket-based real-time features and scalable cross-platform workflows. [Teledoctor Live](#)
- **GiveCharity:** Engineered a web-based fundraising platform connecting donors with causes, featuring campaign creation, secure donation processing, and transparent fund tracking, built with Next.js, React, TypeScript, Zustand, TanStack Query, and Tailwind CSS. [GiveCharity Live](#)
- **Church Management System:** Created a unified frontend dashboard for religious organizations to streamline membership management, event scheduling, and community outreach, focusing on complex data management with a high-performance UI using Angular and Tailwind CSS.

Education

MET Engineering College

B.E.ComputerScienceandEngineering, CGPA: 7.61

Nagercoil, Tamil Nadu

2024

Affiliated to Anna University

Certifications

- Introduction to JavaScript – Great Learning
- Front-End Web Development – Coursera
- Responsive Web Design – Coursera
- UI/UX Design Fundamentals – Coursera
- Introduction to Generative AI – Coursera (Web Applications Focus)
